REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the present invention relates to a memory device having a refresh circuit. The independent claim 1 recites an refreshing circuit for a memory device comprising a plurality of shift registers an nth set of shift registers successively activating word line selection signals according to a given control signal, so as to refresh corresponding word lines of an nth cell array, and a plurality of shift register controllers, an nth shift register controller providing the control signal to the nth set of shift registers when the nth cell array is being refreshed, the nth shift register controller forwarding the control signal to an (n+1)th set of shift registers when said refresh of the nth cell array is finished. The PRIOR ART fails to disclose or suggest such a refresh circuit having shift registers and shift register controllers capable of controller forwarding the control signal to an (n+1)th set of shift registers when said refresh of the nth cell array is finished as described in the independent claim 1, therefore, claims 1-12 are in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vu A. Le whose telephone number is (571) 272-1871. The examiner can normally be reached on M-F (7:00-3:30).
